

Sydney Terminal Area Reconfiguration

Erskineville

Updated notification - May 2024

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Work at Erskineville will involve installation of a hi-rail pad and associated infrastructure to facilitate maintenance access and enhance operation efficiency.

Additional night work

Due to wet weather, we were unable to complete some welding activities for track modifications over the weekend just passed.

We have re-scheduled these activities to take place across 4 nights, between

10pm and 4am from Monday 12 May until Thursday 16 May 2024.

This work will be completed within the rail corridor adjacent to the Macdonaldtown Stabling Yard (see image on back page).

Noise from this work is not expected to be intrusive.

Standard construction hours

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

We schedule work outside of standard construction hours when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.
