

Killara Station Upgrade

Transport Access Program

August 2023

Transport for NSW acknowledges the people of the Darug and Guringai Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is upgrading Killara Station as part of the Transport Access Program (TAP) to make it easier for everyone to access, including people with a disability or limited mobility, parents/carers with prams and customers with luggage.

What work are we doing?

During August, we will be:

- continuing work on station facilities, including the station building
- upgrading the footpath on Werona Avenue
- undertaking finishing work for the new bridge
- carrying out electrical works within the station building and footbridge
- fitting out the new lifts.

When we will be working

Working hours are **Monday to Friday, 7am to 6pm, and Saturday 8am to 1pm.**

We will notify nearby residents and businesses in advance if we need to work outside these times.

Out of hours night work

Out of hours night work is planned from **6pm Friday 25 August until 2am on Monday 28 August.** Work will include regrading of the platform, installation of gutters and downpipes, work on the deflection walls, commissioning of the station services, and minor work on the bridge deck.

Any directly impacted residents will be contacted in advance of the work.

What will this mean for you?

Between 25 and 28 August, partial lane closures may be required on Werona Avenue and Culworth Avenue to safely deliver materials and equipment to the rail corridor. Please follow the directions of traffic controllers.

We will use various equipment, including rattle guns, excavators, compactors, saw cutters, generators, elevated work platforms, tipper and concrete trucks and powered hand tools.

Managing our impacts

The project aims to minimise impacts from our work on the community and the environment by:

- fencing work areas to ensure safety and security
- reducing noise disruption as much as possible by turning off equipment when not in use and using non-tonal reversing beepers.

Powell Street and Northcote Avenue access points

The Sydney Trains access point at Powell Street is used by construction workers to access the railway tracks for construction work. It serves as a temporary storage area for materials during standard construction hours and weekends when trains are not running. Similarly, the Sydney Trains access point at Northcote Avenue is used by our construction crews and other rail workers as storage area, and it provides a safe entry point to conduct construction work in the rail corridor.
