

# Killara Station Upgrade

## Transport Access Program

May 2023

Transport for NSW acknowledges the people of the Darug and Guringai Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is upgrading Killara Station as part of the Transport Access Program (TAP) to make it easier for everyone to access, including people with a disability or limited mobility, parents/carers with prams and customers with luggage.

### What work are we doing?

During May we will be:

- continuing work on improvements to station facilities including the building and platform toilets
- undertaking footpath upgrades on Werona Avenue
- installing screens and finishing work for the new bridge
- undertaking electrical work in the station building and footbridge
- fitting out of the new lifts
- installing the canopy in the boarding assistance zone
- reopening of one section of platform toilets.

### When we will be working

Working hours are **Monday to Friday, 7am to 6pm, and Saturday 8am to 1pm.**

We will notify nearby residents and businesses in advance if we need to work outside these times.

### Out of hours work

Between **6pm Tuesday 2 May and 7am Wednesday 3 May** night work is planned at the station to carry out testing on the network. This work is expected to be inaudible.

Out of hours work at the station is planned from **6pm Friday 5 May until 7am on Monday 8 May.**

Work will include the installation of new canopies and poles, the start of construction of the new deflection walls, establishing the new footbridge and the resurfacing of the platform. The planned work will require the use of a crane, excavators, and lighting towers.

Work will be carried out at night to minimise the impacts on vehicle and pedestrian movements and ensure the safety of our workers and the public. Directly impacted residents will be individually contacted in advance of the work.

During this time, **Werona Avenue will be closed** to allow for the set-up of a crane. One lane on Culworth Avenue is also expected to be closed temporarily. Traffic and pedestrian detours will be in place. Please follow the directions of traffic controllers.

### Temporary bus stop relocation

During the weekend works between **Friday 5 May to Monday 8 May** the bus stop on Werona Avenue will be relocated to Locksley Street, approximately 120 metres from the existing bus stop.

Bus replacement services will be in place as the station will be closed and trains will not be running.

A map of the temporary bus stop relocation is included overleaf.

To plan ahead, please visit [transportnsw.info/](https://transportnsw.info/) for more information on the bus replacement services that will be available during this time.

### Station footbridge temporarily closed

To ensure the safety of our workers and customers, the footbridge at the station will be closed while the above work takes place, from **6pm Friday 5 May until 7am Monday 8 May.** Alternate pedestrian routes to the bus stop on Lorne Avenue are via Stanhope and Powell streets.

Signage will be in place to direct pedestrians while the work is completed. Please follow the directions on these signs and the instructions of traffic controllers.

### What will this mean for you?

We will be using various equipment, including excavators, generator, concrete trucks and powered hand tools.

### Managing our impacts

Our work aims to avoid effects to the community and the environment.

This is managed by:

- fencing work areas for safety and security
- reducing noise disruption as much as possible by
- turning off equipment when not in use and using non-tonal reversing beepers.

### Powell Street and Northcote Avenue access points

The Sydney Trains access point at Powell Street is used by construction workers to access the railway tracks for construction work. It serves as a temporary storage area for materials during standard construction hours and weekends when trains are not running. Similarly, the Sydney Trains access point at Northcote Avenue is used for planned activities by our construction crews and other rail workers, storage area and it provides a safe entry point to conduct construction work in the rail corridor.
