

Killara Station Upgrade

Transport Access Program

October 2023

Transport for NSW acknowledges the people of the Darug and Guringai Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is upgrading Killara Station as part of the Transport Access Program to make it easier for everyone to access, including people with a disability or limited mobility, parents/carers with prams and customers with luggage.

What work are we doing?

During October, we will be:

- continuing work on station facilities, including the station building
- upgrading Werona Avenue's footpath and landscaping
- completing work on the new bridge
- installing tactile ground surface indicators on platforms (see image over the page)
- carrying out electrical work in the station building and footbridge.

When we will be working?

Working hours are **Monday to Friday, 7am to 6pm, and Saturday 8am to 1pm.**

We will notify residents and businesses in advance if we need to work outside these times. Any directly impacted residents will be contacted in advance of the work.

Out of hours night work

Night work is planned for **Wednesday 4 October** from **6pm to 7am**, weather permitting for line marking along Werona Avenue. Night work is also planned for **up to two nights** between **Monday 9 and Friday 13 October**. Activities during this period will include formwork stripping, concreting and downpipe work within the station.

What will this mean for you?

We will use various equipment, including rattle guns, excavators, generators, elevated work platforms, tipper concrete trucks, and powered hand tools.

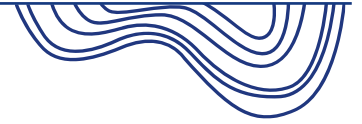

Managing our impacts

The project will minimise impacts from our work on the community and the environment by:

- fencing work areas to ensure safety and security
- reducing noise disruption as much as possible by turning off equipment when not in use and using non-tonal reversing beepers.

Powell Street access point

The Sydney Trains access point at Powell Street is used by construction and rail workers for safe entry to railway tracks and temporary storage during construction and weekends when trains are not running.

Above: Resurfaced Platform 1 and 2.
